CAREER SUMMARY

Software Developer with around **3 years** of experience in designing and building responsive web applications using **React**, Redux Tool Kit, **Tailwind CSS**, Antd and Material-UI. Successfully developed and deployed a full-featured **risk management system** for STC in KSA. Additionally, contributed to the development of a fully funded e-commerce platform Cobone, a highly successful product in the GCC region.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Solidity, Java,
- **Frameworks & Libraries:** React, Next.js, Angular, Vue.js (Composition API) Express.js, Node.js, Material UI, Tailwind CSS, Redux,
- **Web Services:** REST API, Axios, React Query
- **Tools:** VSCode, Github, Git, Bitbucket, Remix
- **Others:** Prisma, MongoDB Atlas, Ether.js, OOP

PROFESSIONAL EXPERIENCE

MID LEVEL FRONTEND DEVELOPER: Cobone |UAE, (Remote, Part-time, Contract)   **Sept 2025 – Present**

- Translate UI/UX designs (wireframes, Figma/Sketch) into responsive, accessible HTML/CSS/JavaScript.
- Integrate frontend components with Grails controllers and REST endpoints (AJAX/fetch), handling.
- Implement interactive features and client-side logic using plain JavaScript (ES5) and jQuery.
- Implemented internationalization (i18n) features across the application to support multiple regions, including Saudi Arabia and UAE.

FRONTEND DEVELOPER: Transviti | Karachi, PK   **Aug 2023 – Sept 2025**

- Collaborated closely with back-end developers to integrate REST APIs into React Component.
- Optimize components for maximum performance and build **reusable components** for future use.
- Built dynamic dashboard based on the latest plots and charts using **g2plots** and **Chart.js**, allowing users to dynamically change layout.
- Optimized frontend performance through **lazy loading**, **memoization**, and **code-splitting** strategies.

WEB3 FRONTEND DEVELOPER | SoftSyncDev | Karachi, PK   **Jun 2023 – August 2023**

- Use libraries like Ether.js or Web3.js to interact with smart contracts. Connect frontend applications with blockchain networks (Ethereum, Polygon, Binance Smart Chain, etc.).
- Read data from blockchain and display it on the Frontend. Manage global states using Redux, or Context API.

MERN STACK TRAINER| SMIT |Hyderabad, PK   **Feb 2023 – May 2023**

- Responsible for conducting training sessions for students. This includes delivering lectures, leading hands-on coding exercises,
- Conducting workshops and facilitating discussions to ensure effective knowledge transfer and skills development.
- Providing guidance and support to students throughout the training program.

ASSOSICATE MERN STACK DEVELOPER| HostelIn | Jamshoro, PK   **Sept 2022 – Feb 2023**

- Developed and deployed highly scalable and responsive full-stack web applications using the MERN stack.
- Implemented secure user authentication and authorization systems (e.g., JWT, OAuth) for secure access control.
- Designed, managed, and optimized NoSQL databases (MongoDB) using Mongoose for efficient data storage, retrieval, and modeling.

PROJECTS

ERMVare: Risk Management System| STC | (Professional Project) Tech Stack: React, Redux, Antd, Axios, Chart.js, React Tables

- A customizable dashboard presents key risk metrics, summaries, and alerts in a clean, responsive UI.
- Users can log new risks with details such as category, likelihood, impact, and description.
- Implemented role-based access control **(RBAC)** to ensure secure user management and data privacy.

Prodexa AI: Demo| Github| Tech Stack: React, Node, Express, Mongoose, JWT, React Query, LangChain

- Used JWT (Cookies) for persistent login sessions and added auth middleware for route protection.
- Utilized LangChain.js with Gemini API for LLM interactions, enabling personalized and context-aware content generation.
- Used JWT (Cookies) for persistent login sessions and added auth middleware for route protection.

EDUCATION

Bachelors in Information technology (3.4/4.0 CGPA) | University of Sindh   2019 – 2023
